

# ■ Problem 5.2

MP      crawling peg ( $\pi \neq \pi^a$ )       $w_{+1}^r = w^r$   
 IS       $P_0$        $w_{+1}^r \neq w^r$   
 IA       $P_0$        $w_{+1}^r = w^r$

## ■ 5.2) Period 0

$$\downarrow w, r = \frac{P_0 \uparrow w}{P \uparrow \uparrow}$$

## ■ 5.2) Period 1

$\pi \uparrow$  (IA↑ MP↑)

①  $\pi > \pi_a \Rightarrow W^r \downarrow$   
 IS↓ AD↓

## ■ 5.2) Period 2

②  $Y < \bar{Y} \Rightarrow \pi \downarrow$   
 $IA \downarrow MP \downarrow$   
 $\pi > \pi_0 \rightarrow w^r \downarrow$   
 $IS \downarrow AD \downarrow$

## ■ 5.2) Period 3

③  $Y < \bar{Y} \Rightarrow \pi \downarrow$   
 $IA \downarrow MP \downarrow$

$\pi = \pi_a$   
 $IS + AD$   
 const.

## ■ 5.2) Period 4

④

$Y < \bar{Y} \Rightarrow \pi \downarrow$

$IA \downarrow MP \downarrow$

$\pi < \pi_a \Rightarrow w \uparrow$

$IS \uparrow AD \uparrow$

⑤

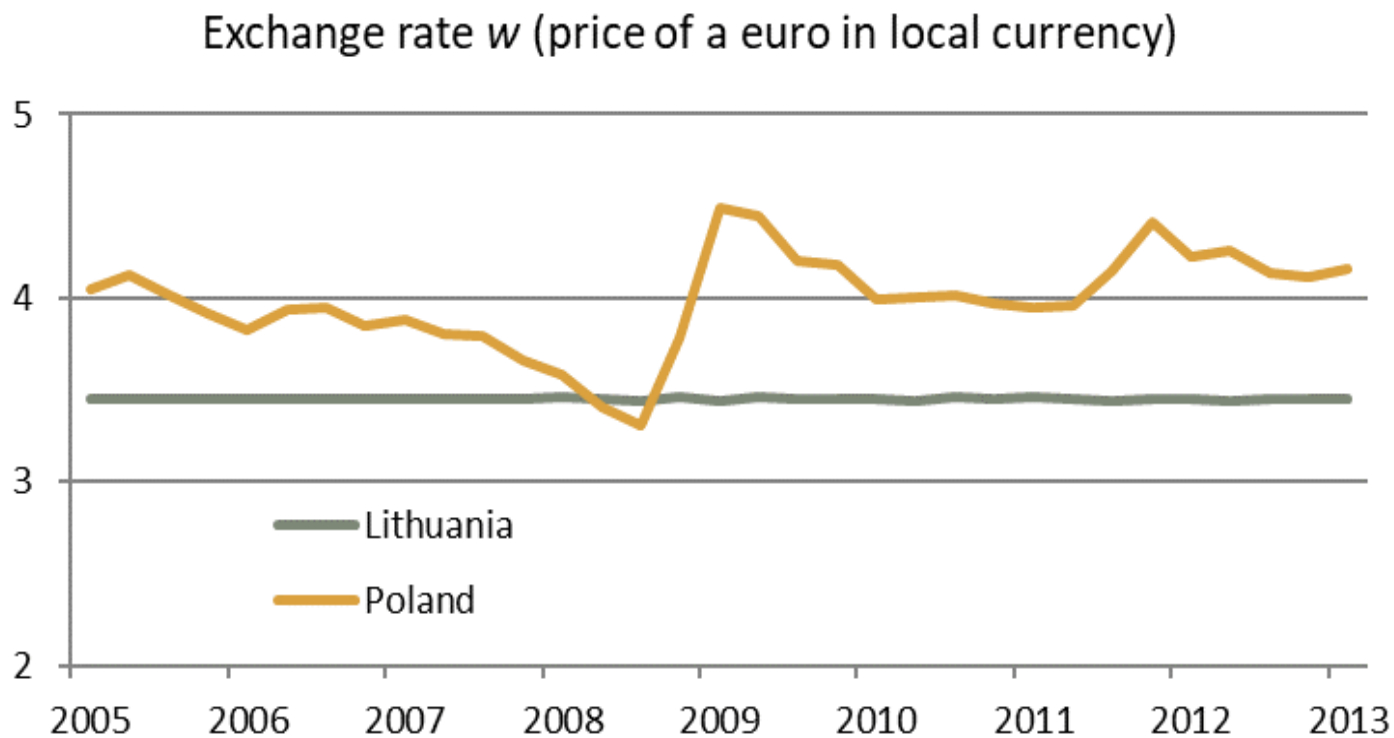

$Y > \bar{Y} \Rightarrow \pi \uparrow$

$IA \uparrow MP \uparrow$

## ■ 5.2) Period 5

## ■ Problem 5.4

# 5.4)

SS:  $r$  constant

$r < r_a \Rightarrow \text{dem} \in \uparrow$

$\bar{w} \quad R \downarrow \quad F \uparrow$

$Y < \bar{Y} \Rightarrow \pi \downarrow \quad r = r_0$

$$\boxed{\uparrow w^r = \frac{P_a \bar{w}}{P \uparrow}}$$

internal depreciation

$$\pi = \pi_{-1} + \delta \left( \frac{Y - \bar{Y}}{\bar{Y}} \right)$$

$$w \uparrow \rightarrow \frac{w^r \uparrow}{IS \uparrow AD \uparrow}$$

ext. depreciation

$$\boxed{\frac{w^r_{t+1}}{w^r_t} > 1}$$
